## 7 million and counting

Blog Posting: 12:03 pm, January 29, 2007 |

Author: [JOHN BOOTH](#)

Seven million is roughly the number of kroner (about \$1.21 million dollars) the Danish government **plans to spend this year** to review policies on aquaculture and assess environmental impacts.

It's also about how many people passed through Cyprus' **two airports** — Larnaca International Airport and a smaller one in Paphos — in 2005.

And it's the reported figure in euros that soccer star Ronaldo may get to **sign with AC Milan**.

Oh, and Berea-based **Lube Stop**, it turns out, rolled its seven-millionth customer through the bays last year.

The company, which turned 20 in 2005, also added 27 fleet customers to its ranks in 2006 and averages 30,000 customer visits per month, according to a press release about the corporate milestone.

Lube Stop also has added free wireless Internet access at its shops, which means if you're so inclined, your oil change can include an online viewing of Napoleon Dynamite's **dance performance** — 7.1 million YouTube views and counting.
